

FUTURE GROWTH FORUM

Monday, 28th June 2021 | 8:30 am to 12:30 pm
Dubai World Trade Center - Sheikh Saeed Hall 2

Every business has felt the impact during the pandemic and required to reinvent itself, even as some have had the benefit of accelerating through this phase.

To ensure that Dubai lays the foundation for a sustainable Future Growth in collaboration with our business partners as key enablers of success, we would like to invite you to the 'Future Growth Forum', a working session which aims to cover topics that are top-of-mind priorities to yield regional and global growth across all sectors and businesses regardless of maturity or scale. The main session of the event will be delivered to you by prominent government officials who will enlighten us on how the Future of Dubai's Economy will be.

The Focus of the event will be on the recent announcement for all government and public sector entities to increase efficiency by 30% this quarter in terms of simplified processes, procedures and de-duplication. You will be invited to share your thoughts in dedicated breakout workshops to sectors relevant to your businesses.

Given the critical nature of this discussion, attendees are selected to include members of the Dubai business community that are committed advocates of the city, and recognised as leaders that will drive change for their company as well as influence peers across the sector"
